PRIVATE SPONSOR TRAVEL CERTIFICATION FORM

This form must be completed by any private entity offering to provide travel or reimbursement for travel to Senate Members, officers, or employees (Senate Rule 35, clause 2). Each sponsor of a fact-finding trip must sign the completed form. The trip sponsor(s) must provide a copy of the completed form to each invited Senate traveler, who will then forward it to the Ethics Committee with any other required materials. The trip sponsor(s) should NOT submit the form directly to the Ethics Committee. Please consult the accompanying instructions for more detailed definitions and other key information.

The Senate Member, officer, or employee MUST also provide a copy of this form, along with the appropriate travel authorization and reimbursement form, to the Office of Public Records (OPR), Room 232 of the Hart Building, within thirty (30) days after the travel is completed.

1.	Sponsor(s) of the trip (please list all sponsors): Alliance to Save Energy
2.	Description of the trip: A fact-finding trip to New York and New Jersey to learn about policies and
	best practices that are helping to drive advances in energy efficiency and energy productivity.
3.	Dates of travel: February 21-24, 2017 (21st - evening travel day)
4.	Place of travel: New York, New York and Newark, New Jersey
5.	Name and title of Senate invitees: Please see attached
6.	I certify that the trip fits one of the following categories: (A) The sponsor(s) are not registered lobbyists or agents of a foreign principal and do not retain or employ registered lobbyists or agents of a foreign principal and no lobbyist or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip. -OR-
	(B) The sponsor or sponsors are not registered lobbyists or agents of a foreign principal, but retain or employ one or more registered lobbyists or agents of a foreign principal and the trip meets the requirements of Senate Rule 35.2(a)(2)(A)(i) or (ii) (see question 9).
7.	I certify that the trip will not be financed in any part by a registered lobbyist or agent of a foreign principal. - AND -
	1 certify that the sponsor or sponsors will not accept funds or in-kind contributions earmarked directly or indirectly for the purpose of financing this specific trip from a registered lobbyist or agent of a foreign principal or from a private entity that retains or employs one or more registered lobbyists or agents of a foreign principal.
8.	I certify that: The trip will not in any part be planned, organized, requested, or arranged by a registered lobbyist or agent of a foreign principal except for de minimis lobbyist involvement. - AND -
	The traveler will not be accompanied on the trip by a registered lobbyist or agent of a foreign principal except as provided for by Committee regulations relating to lobbyist accompaniment (see question 9).

	11.	An itinerary for the trip is attached to this form. I certify that the at by-hour), complete, and final itinerary for the trip.
	12.	Briefly describe the role of each sponsor in organizing and conducting Please see attached.
001272	13.	Briefly describe the stated mission of each sponsor and how the purpos Please see attached.
	14.	Briefly describe each sponsor's prior history of sponsoring congression Please see attached.

9.	USE ONLY IF YOU CHECKED QUESTION 6(B) I certify that if the sponsor or sponsors retain or employ one or more registered lobbyists or agents of a foreign principal, one of the following scenarios applies:
	 (A) The trip is for attendance or participation in a one-day event (exclusive of travel time and one overnight stay) and πο registered lobbyists or agents of a foreign principal will accompany the Member officer, or employee on any segment of the trip. - OR -
	 (B) The trip is for attendance or participation in a one-day event (exclusive of travel time and two overnight stays) and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee on any segment of the trip (see questions 6 and 10). − OR −
	(C) The trip is being sponsored only by an organization or organizations designated under § 501(c)(3) of the Internal Revenue Code of 1986 and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip.
10.	USE ONLY IF YOU CHECKED QUESTION 9(B) If the trip includes two overnight stays, please explain why the second night is practically required for Senate invitees to participate in the travel:
11.	An itinerary for the trip is attached to this form. I certify that the attached itinerary is a detailed (hourby-hour), complete, and final itinerary for the trip.
12.	Briefly describe the role of each sponsor in organizing and conducting the trip:
	Please see attached.
	· · · · · · · · · · · · · · · · · · ·
13.	Briefly describe the stated mission of each sponsor and how the purpose of the trip relates to that mission:
	Please see attached.
14.	Briefly describe each sponsor's prior history of sponsoring congressional trips:
	Please see attached.

Addendum to Senate Private Sponsor Travel Certification Form

5.

The following staff members have been invited to participate on this trip.

- Brie Van Cleve, Science and Technology Fellow, Senate Energy and Natural Resources
 Committee (Minority)
- Yan Zheng, IEEE/AAAS Congressional Fellow, Office of Senator Chris Coons
- Ariel Marshall, Legislative Assistant, Office of Senator Jeanne Shaheen

12.

The Alliance to Save Energy, as the sole sponsor of this trip, was responsible for planning the trip in its entirety and staff members of the Alliance will accompany all participants throughout the duration of the trip.

13.

The Alliance to Save Energy promotes energy efficiency worldwide to achieve a healthier economy, a cleaner environment and energy security. To achieve this mission, the Alliance:

- Leads worldwide energy efficiency initiatives in policy advocacy, research, education, technology deployment and communications that impact all sectors of the economy.
- Provides vision and activism which includes active and engaged members of Congress, leaders from business, the public interest sector and academia.
- Initiates and participates in public-private partnerships, collaborate efforts and strategic alliances to optimize resources and expand its sphere of influence.
- Executes its mission through a team of recognized energy efficiency experts and professionals.

The purpose of this trip is learn about policies and best practices that are helping to drive advances in energy productivity across the country. Our hope is that through visits to sites identified on the itinerary and through meetings with local and state officials that the Congressional staff members will be able to learn about state and business activities and, in turn, use that new knowledge to develop, refine and advance policies at the federal level.

14.

The Alliance has previously sponsored several Congressional field trips.

- Field trip to Boston, Massachusetts that took place from August 10-12, 2016.
- Field trip to San Francisco Bay Area that took place from August 12-14, 2015.
- Field trip to Hartford, CT on August 22-23, 2012 (including travel days).
- Field trip to Denver, CO on January 11-13, 2012 (including travel days).
- Field trip to Philadelphia, PA on August 26, 2011.
- Field trip from August 28, 2005 September 2, 2005 to:
 - o Berlin, Germany
 - o Stuttgart, Germany

- o Brussels, Belgium
- o Terneuzen, Netherlands
- o Rotterdam, Netherlands
- o Amsterdam, Netherlands
- Field trip to New York and California that took place from November 30, 2004 –
 December 3, 2004.

15.

The Alliance hosts a range of educational activities.

- Congressional Briefings
 - We host Congressional briefings throughout the year, which typically focus on a particular aspect related to energy efficiency.
 - January 14, 2016: Cutting Edge Technologies and Businesses: Opening the Door for Energy Efficiency Deployment at Scale
 - February 26, 2016: The Role of Benchmarking, Transparency and Codes in Driving a More Efficient Built Environment.
- Energy Efficiency Global Forum
 - An annual event convened in Washington, DC that brings together executives and policymakers from around the world and across sectors to discuss energy efficiency. In 2016, this exclusive forum explored how utilities, regulators, legislators and companies are incorporating cost-effective energy efficiency measures into their business to help meet increasing demand. The next EE Global Forum is scheduled for May 8-9, 2017 in Washington, DC.
- Accelerate Energy Productivity 2030
 - A partnership between the U.S. Department of Energy, Alliance to Save Energy and Council on Competitiveness to catalyze action in the public and private sectors to help achieve the goal of doubling our nation's energy productivity.
 - O As part of this initiative, three webinars were held in April to provide an in-depth look at several unique aspects of energy efficiency:
 - April 13, 2015: Building Technologies and Finance
 - April 20, 2015: Smart Grid and Smart Manufacturing
 - April 27, 2015: Transportation and Water
- Energy 2030 Events
 - Energy 2030 On the Road These are education, outreach and action campaigns aimed at urging communities through the nation to adopt the goal of doubling U.S. energy productivity. They are held around the country and last year included stops in Seattle, WA, Raleigh, NC and Minneapolis, MN. They follow the same format of other events where panelists discuss a specific theme of energy efficiency and are widely attended by members of local governments, academia, local and state government and the surrounding community.
- Policy Perspectives Breakfasts
 - o Breakfast sessions where we invite a representative from a Federal agency or Congressional office (Senator/Congressman) to come and speak about priorities or updates regarding energy efficiency for the respective agency or office. There

are plans for several of these events in 2017, including in Washington, DC and around the country.

18.

There are several reasons why we have chosen New Jersey and New York as the destination for this trip.

- The American Council for an Energy-Efficiency Economy (ACEE) produces the annual State Energy Efficiency Scorecard, which ranks states based on energy efficiency policies and practices. New York has consistently been in the Top 10 (5th in 2016) of these rankings for the last several years while New Jersey ranked 24th in 2016. The pairing of these two states will give trip participants a more complete view by include a state that consistently ranks near the top (New York) and one that has made significant improvements in recent years (New Jersey). In addition to the state ranking, ACEEE also ranks a selection of major cities on the same criteria and New York City was ranked #2 in 2015. Therefore, New York City is an excellent option for such a trip because we can incorporate strong local level actions along with the broader state-level actions.
- The Alliance to Save Energy is also hosting a public briefing in Jersey City on February 22nd, which will be included as part of the agenda. The briefing is entitled, "Policy Perspectives: Energy Efficiency Leadership in the New York Metro Area," and will feature speakers from state and local government, regional organizations and local business leaders. A full agenda for the event is included below.
- The Greater New York City area boasts a wide range of field examples and opportunities
 to learn about energy efficiency in a relatively small geographical footprint.
 - o Panasonic Corporation
 - Panasonic is one of the largest product manufacturers in the world, comprised of 473 companies and employing over 260,000 people. The offices in Newark, NJ, which is a new building (LEED Platinum) designed to contribute to Panasonic's efforts to reduce carbon footprint by 50%, also hosts the Panasonic Innovation Center. The central focus of the Innovation Center is displays of solutions designed for business users. The Innovation Center introduces the company's latest technologies, vision, and history. It is divided into various different areas to promote Panasonic's wide range of B2C and B2B fields, from home solutions to avionics, automotive, and eco solutions.
 - o Lime Energy
 - Financing for energy efficiency is often the most difficult aspect of a project, especially for small businesses. Lime Energy is the leading national provider of energy savings to utility clients under Small Business Direct Install (SBDI) programs. They accomplish this by being a one-stop shop for the delivery of comprehensive, direct install energy efficiency services.
 - o Daikin Solutions Center
 - Daikin Applied designs and manufactures technologically advanced commercial HVAC systems for customers around the world. In fact, Daikin Industries, the parent company, is the largest HVAC manufacturer

in the world. The Jersey City offices are home to the Daikin Solutions Plaza, which allows visitors to experience Daikin's new technologies first hand and learn more about how these products are helping to drive advances in energy efficiency and consumer comfort.

- o One World Trade Center
 - One World Trade Center is the newest addition to the New York City skyline and it is also setting new standards for energy efficiency and sustainability in high-rise buildings. The building recently earned LEED Gold certification and with its height at 1,776 feet, One World Trade Center is the tallest building and one of the most sustainable in the Western Hemisphere. The building incorporates many energy efficient products, including HVAC from Daikin and Thyssenkrupp elevators (fastest in the Western Hemisphere).
- o Trane (Ingersoll Rand) Projects
 - Trane, a subsidiary of Ingersoll Rand, is an HVAC company that provides services for residential, commercial and industrial customers. They have many projects in the Greater New York City area that incorporate innovative thermal storage options to save commercial customers money on heating and cooling expenses. These projects are also wise investments as they often have fairly short payback times, which is an important thing to consider for businesses.
- o New York State Energy Research and Development Authority (NYSERDA)
 - NYSERDA is the key state agency that promotes the use of energy efficiency and renewable energy, which achieves its goal of reducing greenhouse gas emissions, accelerating economic growth and reducing customer energy bills. NYSERDA's involvement in energy efficiency is significant and spreads across a diverse set of programs, but one of the biggest projects is Reforming the Energy Vision (REV). One of the key goals of this project is reduce energy consumption in buildings by 23% by 2030. If this ambitious project proves to be successful, it would serve as an excellent model for other states that want to accomplish the same goals.
- o New York City Energy Efficiency Corporation (NYCEEC)
 - Financing is often the most difficult aspect of an energy efficiency project because savings are accrued over time while costs must be met upfront. NYCEEC is an innovative business that is helping to make New York City a greener, cleaner and more affordable city by providing financing and guidance for clean energy building projects. To date, NYCEEC has financed over \$93 million dollars of clean energy projects across 5.6 million square feet.
- New York Power Authority (NYPA)
 - NYPA is the largest state public power organization in the United States. In 2012, NYPA financed nearly \$270 million in energy efficiency projects completed or in various stages of development another record for these types of expenditures. As a result of these projects, New York State taxpayers can expect to save \$6.4 million a year on energy costs at public facilities. And because the "cleanest" megawatts are the ones not used,

NYPA's latest energy-saving efforts will help reduce greenhouse gas emissions by 33,900 tons annually.

- o Metropolitan Transportation Authority (MTA)
 - The Metropolitan Transportation Authority is North America's largest transportation network, serving a population of 15.3 million people in the 5,000-square-mile area fanning out from New York City through Long Island, southeastern New York State, and Connecticut. Due to its sheer size, MTA has a lot of energy savings potential that can be realized through energy efficiency. In 2015, MTA completed its largest energy efficiency project at Grand Central Station. This project, which cost \$25 million, is expected to save \$2.5 million and reduce greenhouse gas emissions by 11,200 tons annually.
- o American Water
 - American Water provides high-quality water and wastewater services to approximately 15 million people in more than 1,600 communities in the United States as well as parts of Canada. Headquartered in Voorhees, NJ, we are the largest investor-owned water and wastewater utility company in the United States. American Water recently completed a pilot project on Long Island that incorporated a geothermal system into a local elementary school. This project utilizes a different type of geothermal technology that provides the same productivity, but does not require the same number of bore holes, which reduces construction costs.
- o Mayor De Blasio's Office (Mayor of New York City)
 - Mayor De Blasio initiated several new projects last year, part of the OneNYC initiative, that will dramatically reduce greenhouse gas emissions from buildings in NYC. The goal of that project is to reduce energy consumption by 80% by 2050 and energy efficiency will be heavily relied upon to meet the goal. The city will spend a projected \$1 billion over the next 10 years to make these improvements a reality.
- o Industry City Distillery
 - The Industry City Distillery is reexamining the vodka distillation process and has designed a system that attempts to be as energy efficient as possible. In fact, the distillery is actually three times more energy efficient and six times more water efficient than other distilleries. This starts with the size of the facility, which is about the size of a standard one-bedroom apartment in the city, so space is at a premium and that prevented the usage of more traditional distillation techniques. These techniques have proven to be successful and could help other distilleries become more energy efficient as well.
- Bluestone Organization
 - We plan to visit with the Bluestone Organization, a local real estate developer, which has developed several high-efficiency apartment buildings in the NYC area. As part of Bluestone's initiative to protect the environment, Norman Towers boasts state-of-the-art, energy efficient central air and heating, lighting and appliances, helping to conserve energy as well as add money-saving value to residents. Energy efficiency,

especially in residential apartment buildings, can be tough to incorporate so this will offer a great example of how such projects can be completed.

19.

First night: Hotel Indigo

Address: 810 Broad Street, Newark, NJ 07102

Second Night: Hyatt Regency Jersey City on the Hudson Address: 2 Exchange Place, Jersey City, NJ 07302

Third Night: Courtyard New York Manhattan/Fifth Avenue Address: 3 E 40th Street, New York, NY 10016

20.

We will be staying at three hotels over the course of this trip.

Hotel Indigo in Newark, NJ

 The Hotel Indigo was able to meet the GSA rate of \$140 per night and could accommodate the size of our group. It is close to the train station and to the first item on the agenda the following morning.

Hyatt Regency Jersey City on the Hudson in Jersey City, NJ

 The Hyatt Regency was able to meet the GSA rate of \$140 per night and could accommodate the size of our group. It is close to the last event of the day and also provides easy access to downtown NYC via public transportation for the continuation of the trip the following morning.

Courtyard New York Manhattan/Fifth Avenue

 The Courtyard New York Manhattan/Fifth Avenue was able to meet the GSA rate of \$168 and could accommodate the size of our group. It is located very close to Grand Central Station, which is where we will start the following day.

21.

For the purposes of this trip, the cost of meals and other incidental expenses will remain within the per diem limit set by the General Services Administration (GSA).

Policy Perspectives:

Energy Efficiency Leadership in the New York Metro Area

Wednesday, February 22 | 3:00 p.m. - 5:15 pm

Daikin Solutions Plaza | 10 Exchange Pl, 21st Floor, Jersey City, NJ 07302 ____ | . 7 5 hrs.

	3:00 pm - 3:15 pm	Registration
.o8	3:15 pm - 3:20 pm	Welcome Remarks Kateri Callahan, President, Alllance to Save Energy
.19	3:20 pm - 3:35 pm	Keynote Remarks Senator Cory Booker (D-N.J.)
.63	3:35 pm - 4:15 pm Moderator: Speakers:	Public-Private Partnerships: Advancing Energy Efficiency & Resiliency in the New York Metro Area Sue Coakley, Executive Director, Northeast Energy Efficiency Partnerships Ras Baraka, Mayor of Newark, New Jersey Representative, Consolidated Edison Mark Chambers, Director, Mayor's Office of Sustalnability, City of New York Jordan S. Mersky, Vice President, Business Development, American Water* John Rhodes, President & CEO, New York State Energy and Research Authority
	4:15 pm - 4:30 pm	Break
.67	4:30 pm - 5:10 pm Moderator: Speakers:	Energy Efficiency Financing: Innovation & Leadership in the New York Metro Area Jill Anderson, EVP and Chief Commercial Officer, New York Power Authority* Susan Leeds, CEO, New York City Energy Efficiency Corporation Adam Procell, President & CEO, Lime Energy*
		Ben Healey, Director of Clean Energy Finance, Connecticut Green Bank* Maureen Hassett, SVP, Governance, Communications & Strategic Initiatives, New Jersey Economic Development Authority
. თგ	5:10 pm - 5:15 pm	Closing Remarks Kateri Callahan

Tuesday, Fe	bruary 21 st	
6:05 PM	Depart Union Station for Newark Penn Station (Newark, NJ)	
	Amtrak 138 Northeast Regional Train (Tickets not yet purchased)

	Greg DiNardo, Solutions Plaza Manager
	Gabriele Elschner, Manager Events/Exhibitions & Marketing Communications
	Luis Ramos, Head of Communications
	The visit to the One World Trade Center includes several facets: it will be a continuation
	of the Daikin visit to see Daikin HVAC systems in a real-life setting, it will allow us to
	I down about the Thyssenkrupp elevators that are used in the building, which are some o
	the fastest and most energy-efficient in the world, and to learn about the sustainable
	design principles used when constructing the building.
10:30 AM	Depart for Port of New York Authority Building
11:00 AM	Arrive at Port of New York Authority — Tour of Trane Thermal Storage Project
11.00 7.11	111 8 th Avenue
	New York, NY 10011
	Brenda Amarant, Marketing Leader for Trane NY/NJ
	Andrew Merrill, General Sales Manager – NYC
	Tenno a subsidiary of ingersoil Rand, is another company known for its HVAC systems,
	but also installs systems that operate using thermal storage. These systems create ice
	during the night when electricity is cheaper and use it to cool the building during the
	day. This method serves as an alternative to traditional air conditioning systems and
	gay, this method serves as an alternative to treatment of the
	also offers improvements in energy efficiency.
12:30 PM	Lunch at Whitney Museum
	99 Gansevoort Street
<u> </u>	New York, NY 10014
1:30 PM	Tour of Whitney Museum's energy efficiency and resiliency efforts
	Peter Scott, Director of Facilities
	David Selimoski, Engineering Manager
•	As a museum; the Whitney Museum has a fairly unique situation when it comes to
	energy efficiency, at least compared to the average building. This includes handling
	large crowds, additional security, specific conditions required for protecting the artwork
	from environmental damage, etc. This visit will include a meeting with the building
	engineers and a brief tour of the building.
2:30 PM	Donort for NIVSERDA
3:00 PM	Arrive at NYSERDA for Roundtable Discussion with NYSERDA, NYPA, City of New York
J.33	and NYCEEC (involved in project implementation, financing, etc.)
	1359 Broadway

	New York, NY 10018
	John Williams, Director of Energy Analysis (NYSERDA)
! !	Jill Anderson, Executive Vice President (NYPA)
	John Lee, Deputy Director for Green Buildings and Energy Efficiency (NYC Mayor's Office
	of Long Term Planning and Sustainability)
	Susan Leeds, CEO (NYCEEC)
5:00 PM	Depart for hotel
	Courtyard New York Manhattan/Fifth Avenue
1	3 E 40 th Street
	New York, NY 10016
Friday, Febr	
8:00 AM	Wakeup Call and Breakfast
8:30 AM	Depart for Grand Central Station
9:00 AM	Arrive at Grand Central Station for Tour with NYPA and MTA
3.00 AIVI	89 E 42 nd Street
1	New York, NY 10017
	Peter Bass, Director of Environmental and Energy Policy (MTA)
	Christine Keta, Manager of Program Operations and Administration (NYPA)
į	Grand Central Station offers us the ability to learn about building energy efficiency in a
	historic building, which poses unique challenges, and also to learn about transportation
	via the Metropolitan Transportation Authority, which operates the largest metro
	system in the world.
11:00 AM	Depart Grand Central Station for Valley Stream American Water Geothermal Pilot
11.00 AIV	Project
12:00 PM	Arrive at Project Site (William Buck Elementary School) for lunch, presentation and tour
12.001	75 Horton Ave
1	Valley Stream, NY 11581
	Aldie Warnock, Senior Vice President
	Presentation and tour of the project to learn about this geothermal pilot project. The
	project utilizes a new method for geothermal systems that maintains functionality while
	reducing installation costs. This is a demonstration project to prove that the concepts
	can in fact work and generate energy savings.
2:00 PM	Depart Valley Stream for Jamaica, Queens
2.00 / 171	Bus Company TBD
2:30 PM	Arrive at Norman Towers (Bluestone Organization project) for tour of sustainable
2.30 1 101	apartment building
	90-14 161 st Street
	Jamaica, NY 11432
	Fric Rivestone, Partner at The Bluestone Organization
	Fnerry efficiency in the residential sector is very difficult because of the high upfront
	costs that most families cannot afford. This visit and tour will provide participants with
	insights into why The Bluestone Organization develops energy-efficient apartment
	buildings and how they are able to cover the additional costs.
3:30 PM	Depart Norman Towers for Industry City Distillery
4:30 PM	Arrive at Industry City Distillery for tour of energy and water efficiency measures
7.55 1 17.	33 35th Street, 6th Floor
	Brooklyn, NY 11232
